

Owner's & User's Manual

Safety Information, Installation and Care & Maintenance Instructions.

Volleyball Net

Suits the GeeTramp Force 10x17 Trampoline with 6 Net Pole Enclosure.

Warning: Read this manual before assembling and using the Volleyball Net.

TRAMPOLINE USE AND SAFETY INFORMATION

- The volleyball net size and attachment straps are designed to fit GeeTramp Force 10x17 Trampoline. It is not designed for any other models, sizes or brands.
- The Volleyball Net can provide a high element of fun: however please take extra care because introducing a new element also changes the normal environment that you may be used to.
- The safest way to use a trampoline usually is one user on the trampoline at any one time, however with the volleyball net installed the trampoline is demarcated in half, creating two visually (but not physical) play zones, one user at each end, so,
- Be aware that the Volleyball net is not designed to prevent inadvertent body contact by the users approaching the volleyball net from either side. Serious injury could result. The users need to discuss prior to use and agree on their rules of use to specifically prevent this e.g.
 - the volleyball net is not to be used for anything other than for volleyball
 - only one user can approach the volleyball net at a time
 - do not jump into or hang onto the volleyball net or allow others to do so
 - no blocking at the net
 - etc.
- Use with adult supervision.
- No more than one person on either side of the volleyball net.
- When the volleyball net (and ball) is not being used simply un-click the 4 attachment points and remove from the trampoline, the mounting straps can remain on the trampoline for quick volleyball net setup.
- Do not leave the volleyball net on the trampoline during windy conditions.
- These rules are in addition to the Trampoline rules, please contact us if you have lost your trampoline manual.

PARTS LIST

#	DESCRIPTION	QTY
A	Volleyball Net	1
B	Upper Attachment Strap	2
C	Lower Attachment Strap	2

INSTALLATION

Upper Attachment Strap

Thread the Upper Attachment Strap (ref item "B") around the Upper Net Tee (centre section on the long side of the trampoline) as shown.

Loop the loose end of the strap back through the D buckles as shown

You can adjust the final tension at the end by pulling through the loose end.

Connect the top of Volleyball net.

INSTALLATION

Upper Attachment Strap (cont.)

Repeat this process to attach the other end of the Volleyball net upper strap.

Tension the volleyball net at both ends.

Aim to not have too saggy or too tight.

If you are unable to get enough tension along the top of the volleyball net, then you can use up some of the upper strip by making a loop as shown.

Lower Attachment Strap

At the centre net pole on the long side of the trampoline

Measure approx. 550mm from the top of the pads

This is where the lower strap string ends will be tied off.

INSTALLATION

Lower Attachment Strap (cont.)

Enlarge an existing net hole, to avoid damage to the trampoline netting, use something with a tapered end, e.g., a biro is a good size.

Thread one end of the Lower Attachment Strap (ref item "C") through the enlarged hole.

Repeat this at the same height but on the other side of the net pole as shown

INSTALLATION

Lower Attachment Strap (cont.)

Tie off the two ends on the outside of the trampoline with a simple knot.

NOTE:

Consider using a knot that remains tight in use but simple to undo if you ever need to remove, e.g; a double shoe lacer

Clip the bottom of the Volleyball Net.

Re-adjust the top straps to adjust final tension as desired.

CARE & MAINTENANCE INSTRUCTIONS

- Adjust straps as required.
- Check condition of volleyball net for signs of wear or damage prior to each user session.
- Unclip and remove the Volleyball net when not in use
- Store Volleyball net inside out of the weather.
